

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for CITY OF ROSEBUD PWS 0730003

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During MAY 2023, JUNE 2022, we did not monitor or test for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done? [Describe corrective action, for example: We collected every required coliform sample in [month and year] and are no longer in violation.] In order to return to compliance our system had to collect monthly distribution samples, take it to a lab to be analyzed and send the results to TCEQ and **those samples were collected on 06/21/2023, 07/20/2022 and we were no longer in violation.**

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by **CITY OF ROSEBUD.**

State Water System ID# 0730003

Mandatory Language for Monitoring and Reporting Violation

Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)

MONITORING, ROUTINE (DBP), MAJOR/CHLORINE

CITY OF ROSEBUD PWS 0730003 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual

at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

Type of violation: **DLQOR**

This violation(s) occurred in the monitoring period(s) 1Q2022

We are taking the following actions to address this issue: We have submitted our DLQOR in a timely manner and have returned to compliance as of 08/31/2022.

<corrective actions>

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
